SUMMARY

SDET with hands-on experience in test architecture, AI-driven automation, and application security testing. Builds reusable utilities and integrates AI tools (Claude, GitHub Copilot) into QA workflows as part of a centralized Playwright framework team. Recognized by 15+ global organizations — including SAP, Samsung, OLX, and (ISC)² — for responsible vulnerability disclosures.

WORK EXPERIENCE

Associate Engineer, Altimetrik (formerly SLK Software)

Dec 2024 – Present

- Develop reusable utilities and test helpers within a centralized Playwright UI & API framework as part of the Test Architect team, improving framework scalability and team adoption.
- Integrate AI-driven automation solutions using Claude and GitHub Copilot, accelerating automated test authoring and increasing QA engineering efficiency.
- Build and maintain CI/CD pipelines using GitHub Actions, enabling automated test execution on every build and reducing manual validation overhead.
- Convert manual test suites to Playwright automation, improving test reliability, speed, and overall coverage.
- Proactively conduct independent security assessments on client and internal applications using ethical hacking techniques, identifying and responsibly disclosing multiple vulnerabilities

Web Developer Trainee, Bharat Coking Coal Limited (BCCL)

Aug 2022 – Sep 2022

- Built and styled UI components for the Lease Portal for Rental Services project using HTML, CSS, Bootstrap, MySQL, and PHP in a team environment.
- Discovered and ethically reported a critical SQL injection vulnerability during development, receiving formal recognition from management.
